## Medium 'Family' ovens

On-site installation base construction details:

Medium 'Family'	
<b>External dimensions of oven</b>	
Length (front to back)	1255mm
Width (left to right)	990mm
Oven Height (excluding flue)	680mm
Weight	550kg
<b>Flue details</b>	
Flue Height	900mm
Flue Extensions (if supplied)	900mm
Flue Diameter	150mm
Centre of flue (from front)	155mm
<b>Suggested base sizes (bench designs) Diagram A</b>	
Length including prep area	1500mm
Front prep area	325mm
Width (suggested minimum)	1100mm
Width (with side prep area)	2250mm
Wood Box to suit your requirements – suggest 600mm x 600mm x 800mm deep	
Height (bench height)	900mm to 950mm

Medium 'Family'	
<b>Suggested base sizes (corner designs) Diagram B</b>	
Sides (absolute minimum)	1300mm
Sides (good)	1500mm
Sides (recommended)	1700mm
Width off wall	700mm
Front prep area (widest point)	325mm
Wood Box to suit your requirements – suggest 600mm x 600mm x 800mm deep	
Height (bench height)	850mm to 950mm
Distance from back corner to front of oven floor	1400mm

**Concrete slab – important note**

A reinforced concrete slab (70mm thick) will need to be poured by the base builder to support at least 400kg (baby and family size) or 1 tonne for large size. The slab is built to a level just below the top of the brick work. This recess will effectively allow you to lay tiles with the oven floor making it easier for trays to slide out. If a recess is not available then the oven floor will sit 50mm proud of the top of the brick work to give you a step down.
